29.01.03.H0.20 Security Awareness

Approved: April, 2014
Next Scheduled Review: April, 2019

Procedure Statement

Understanding the importance of information security and individual responsibilities and accountability pertaining to information security are paramount to achieving organization security goals. This can be accomplished with a combination of general information security awareness training and targeted, product-specific training. The security awareness and training information needs to be ongoing and updated as needed. The purpose of the security training procedure is to describe the requirements to ensure each user of university information resources receives adequate training on information security issues.

Reason for Regulation

- Required by Texas Administrative Code Section 202

- This Standard Administrative Procedure (SAP) applies to University information resources that store or process mission critical and/or confidential information.

- The purpose of the implementation of this SAP is to provide a set of measures that will mitigate information security risks associated with security awareness. There may also be other or additional measures that will provide appropriate mitigation of the risks. The assessment of potential risks and the application of appropriate mitigation measures are to be determined by the information resource owner or their designee. In accordance with Texas Administrative Code 202 - Information Security Standards, each department and/or resource owner may elect not to implement some or all of the risk mitigation measures provided in this SAP based on information security risk management decisions and business functions. Such risk management decisions must be documented and reported to the designated Information Security Officer (ISO).

- The intended audience for this standard administrative procedure includes, but is not limited to, all information resources data/owners, users, management personnel, students and system administrators.
Procedures and Responsibilities

1. All Texas A&M University-Texarkana personnel who use information resources are required to comply with the procedures outlined in this SAP. A method to accomplish the requirements listed below is provided through the use of the Information Security Awareness (ISA) training module. This web based training module is accessed via Single Sign-On (SSO). The module is one of the offerings listed in the Training section.

   1.1. All new employees shall complete security awareness training within 30 days of being granted access to any Texas A&M University-Texarkana information resources. This shall be part of the new employee’s orientation training.

   1.2. All users must acknowledge they have read, understand, and will comply with university requirements regarding computer security policies and procedures.

   1.3. All users shall acknowledge completion of university security awareness training on an annual basis.

2. Departments may require additional incidental training and require acknowledgement as determined by the department.

3. Departmental information technology personnel shall establish and maintain a process to communicate new security program information, security bulletin information, and security items of interest to departmental personnel.

Related Statutes, Policies, or Requirements

- Texas Administrative Code Section 202

Definitions

**Information Resources (IR):** the procedures, equipment, and software that are designed, employed, operated, and maintained to collect, record, process, store, retrieve, display, and transmit information or data.

**Owner of an Information Resource:** an entity responsible for a business function and for determining controls and access to information resources supporting that business function.

**Information Security Officer (ISO):** responsible for administering the information security functions within Texas A&M University-Texarkana and reports to the Information Resources
Mission Critical Information: information that is defined by the University or information resource owner to be essential to the continued performance of the mission of the University or department. Unavailability of such information would result in more than an inconvenience. An event causing the unavailability of mission critical information would result in consequences such as significant financial loss, institutional embarrassment, failure to comply with regulations or legal obligations, or closure of the University or department.

Protected information: shall be defined as data that has been designated as private, protected, or confidential by law or by the University. Protected information includes, but is not limited to, employment records, medical records, student records, education records, personal financial records (or other individually identifiable information), research data, trade secrets, and classified government information.

Protected information shall not include public records that by law must be made available to the general public. To the extent there is any uncertainty as to whether any data constitutes protected information, the data in question shall be treated as protected information until a determination is made by the University.
